English - Fluent

Lehlohonolo Wessie

Backend Developer | Founder, Dolphin Bou Audio | Co-Founder, Lehero Solutions

PROFESSIONAL SUMMARY

Backend developer focused on JavaScript/Node.js, SAP CAP, and service-oriented architecture, with a practical DevOps mindset. Builds full-stack web and mobile applications using React and React Native, including ecommerce platforms and AI-enabled HR/payroll systems. Co-founder of Lehero Solutions and Dolphin Bou Audio, and creator of open-source tools including PDFoid, Gideo API Tool, and MCPSOIDS.

EXPERIENCE

Co-Founder

Lehero Solutions | Gauteng, South Africa

February 2025 - Present

- Co-founded a technology solutions company focused on software delivery for business operations.
- Lead backend architecture and implementation for client applications.
- Collaborate on product strategy, scalable implementation, and cross-industry delivery.

Backend Developer

Self Employed | South Africa

September 2024 - Present

- Built full-stack web applications for personal, client, and co-founded business projects.
- Delivered an ecommerce platform and supported client brand styling with a small team.
- Developed an AI-enabled HR and payroll system as part of a co-founded AI suite.
- Designed and managed PostgreSQL databases for application backends.

Freelance Graphic Designer

Self Employed | South Africa

June 2018 - Present

- Created cover art, logos, custom art pieces, and clothing mockups for diverse clients.
- Managed project timelines and deliverables to keep outcomes timely and polished.
- Expanded design experience into UI/UX design and 3D animation for digital products.

EDUCATION

Bachelor of Arts - Philosophy

University of Pretoria (Universiteit van Pretoria)

January 2018 - December 2020

SELECTED PROJECTS

PDFoid

Open-source PDF editor and viewer built to streamline document workflows.

Tech: React, TypeScript, PDF.js, pdf-lib

Gidevo API Tool

Open-source API toolkit that helps developers and enterprises scale integrations.

Tech: Node.js, REST API

MCPSOIDS

AI-driven tools for small businesses and enterprises to improve efficiency.

Tech: AI, Node.js, Cloud

CERTIFICATIONS

SAP Certified Associate - Backend Developer (SAP CAP) - SAP
September 2024

- Mastered SAP Cloud Application Programming Model (CAP) concepts for scalable cloud solutions.
- Gained backend development expertise in SAP environments with JavaScript/Node.js and SOA.

PROFESSIONAL DEVELOPMENT

- Continuously learning backend development tools and frameworks through online platforms.
- Participated in workshops on cloud computing, backend development, AI agents, and LLMs.

TECHNICAL FOCUS

Backend APIs - REST services, microservices, service-oriented architecture, Node.js, Express.js

Business Systems - Ecommerce, HR/payroll automation, database-backed operational tooling

Delivery Mindset - Practical DevOps habits, GitHub workflow, Docker, API testing, client delivery
